

CLIMATE Textures

MU 2 6 3 1

gancedo
1945

La belleza que reside en la honestidad y la satisfacción que produce el cuidado de nuestro planeta, han sido los elementos definitivos para la creación de la colección CLIMATE de Gancedo.

Lo que aparentemente contamina nuestra atmósfera y nos causa rechazo, es hoy la materia prima de la que nace nuestra colección más ecológica: botellas de PET. Una segunda vida para los residuos de un material altamente contaminante. Crear, innovar y reciclar no son incompatibles. Cada vez somos más conscientes de la importancia que tiene reducir el impacto medioambiental de nuestras creaciones, mediante el empleo de una producción eficiente.

Los tejidos CLIMATE tienen en común la suavidad al tacto, son agradables, sofisticados y elegantes, ofrecen una línea de colores audaz y brillante. CLIMATE es, en apariencia, un tejido de altas prestaciones tan lujosos como el resto de nuestras colecciones, pero con la peculiaridad de dar solución al gran problema del plástico. El reciclaje no sólo omite gran parte del impacto medioambiental, sino que, además, permite convertir eficientemente esta materia prima en un tejido tapicero. El innovador proceso de producción de estos textiles proporciona las mismas propiedades que un tejido convencional. Es fuerte, resistente y, sobre todo, muy suave.

The beauty inherent in honesty and the satisfaction which caring for our planet produces constituted the definitive elements in the creation of the Gancedo CLIMATE collection.

That which apparently pollutes our atmosphere, and we recoil from, is today the raw material from which our most ecological collection has emerged: PET bottles. A new life for the waste from a highly polluting material. Creating, innovating and recycling are not incompatible. We have become ever more aware of the importance of reducing the environmental impact of our creations, through the use of efficient means of production.

CLIMATE fabrics all feature softness to the touch, and are pleasant, sophisticated and elegant, offering a bold, brilliant colour palette.

CLIMATE is, to all appearances, a high-end fabric every bit as luxurious as the rest of our collections, but with the quirk of providing a solution to the plastic problem. Recycling not only avoids environmental impact to a large extent, but also allows this raw material to be converted efficiently into an upholstery fabric. The innovative process used in the production of these textiles provides the same properties as a conventional fabric. It is strong, hard-wearing and, above all, very soft.

Dentro de la gama CLIMATE, encontramos Climate Textures: Con 4 tipos de texturas muy diferentes:

TRUST: Es una tapicería con conciencia. Tejida con hilos de microchenilla para crear una tela voluminosa, gruesa y amorosa al tacto.

BLEND: Es un suntuoso textil sostenible y extraordinariamente suave con un 66 % de materiales reciclados.

ENVISAGE: Lujosa tela de tapicería tejida con diferentes tipos de hilos de lana virgen y sostenibles.

SENSE: Jacquard de chenilla de tacto imponente, suave, cómodo y con cuerpo. Su composición: 64% PET (procedente de botellas recicladas) 29% PES 7% CO (procedente de restos de producción de algodón) con urdimbre proveniente de poliéster virgen (PET), lo convierten en una de las más eficientes de la serie.

Within the CLIMATE range, we find Climate Textures: With 4 types of very different textures:

***TRUST:** Upholstery with a conscience. Woven on an air jet loom with micro chenille yarn to create a fabric which is thick, yet voluminous with a lovely feel.*

***BLEND:** A sumptuous, extraordinarily soft sustainable textile with 66% recycled materials.*

***ENVISAGE:** A luxurious upholstery fabric woven from different types of sustainable virgin yarns.*

***SENSE:** A soft, comfortable, chunky chenille Jacquard with an impressive feel. Composition: 64% PET (from recycled bottles) 29% PES 7% CO (from cotton production remnants) with the warp provided by virgin polyester (PET), making it one of the most efficient in the series.*

Todas las referencias de Climate textures están disponibles en una gama de color amplia, profunda y moderna.

El compromiso de Gancedo con la sostenibilidad va más allá de una simple declaración de intenciones. Una filosofía empresarial que se traslada a lo largo de cada una de las áreas de la compañía. Presente no sólo en los valores artesanales, sino también vinculados a la incorporación de los procesos innovadores que minimizan el impacto ambiental de nuestros productos. **Por eso hemos creado la línea CLIMATE para dar respuesta a una de las necesidades más demandadas por nuestros clientes: la creación de tejidos sostenibles, pero manteniendo la calidad y garantía de los textiles convencionales de Gancedo.**

All Climate textures items are available in an array of deep, modern colours.

*Gancedo's commitment to sustainability goes beyond a simple declaration of intent. A business philosophy that has been transmitted throughout every one of the company's areas. Present not only in craftsmanship values, but also connected to the incorporation of innovative processes which minimise the environmental impact of our products. **This is why we have created the CLIMATE line to meet one of the needs most demanded by our clients: the creation of sustainable fabrics while maintaining the quality and guarantee of conventional Gancedo textiles.***
