Tras un largo periodo abrazando la naturaleza como único y verdadero universo de bienestar, nuestras creaciones se trasladan ahora al interior de los espacios para convertirlos en un ambiente cálido e íntimo en el que prime el confort.

Es el momento de retirarnos para regenerarnos, dejarnos llevar por un nuevo renacer, refugiarnos para retomar fuerzas y afrontar nuestra metamorfosis con energía renovada. Para favorecer esta metamorfosis, Gancedo propone una serie de chenillas lujosas, suaves y amorosas que invitan a crear espacios acogedores y elegantes.

Cocoon son dos telas de diferente textura y extremadamente resistentes, capaces de aportar calidez y bienestar a cualquier ambiente.

Swadd es un falso liso de chenilla de tacto suave, extraordinariamente versátil y de fácil mantenimiento. Está disponible en 22 colores.

Cocoon es un bouclé de microchenilla de poliéster extra suave y con volumen que emula el borreguito. De tacto adorable, cálido y confortable. Símbolo inequívoco de la idea de refugio, de retiro para experimentar la metamorfosis hacia una nueva realidad más dinámica e intensa tras un periodo de retiro y de relax.

Está disponible en 20 tonalidades.

La paleta de color es suave con predominio de colores cálidos y reconfortantes, como tonos tierra, cremas y tonalidades neutras que invitan a la tranquilidad y al bienestar. Las dos referencias comparten gama de color, lo que permite una perfecta combinación entre ellas.

Las telas Cocoon tienen más de 100.000 ciclos martindale, por lo que son ideales para tapicería, pero también para confeccionar cortinas o almohadones. Piezas imprescindibles para convertir el minimalismo más funcional en un espacio agradable en el que desarrollar tu vida.

James Wainscoat

After a lengthy period embracing nature as the one and only world of wellbeing, our creations have now been brought indoors to turn spaces into a warm, intimate environment in which comfort reigns supreme.

It's time to retreat and reinvigorate ourselves, to be carried away and reborn, to seek refuge in order to rebuild our strength and face our metamorphosis with renewed energy. To foster this metamorphosis, Gancedo suggests a series of lovely soft, luxurious chenilles which encourage the creation of cosy yet elegant spaces.

Cocoon features two extremely hardwearing fabrics in different textures, which can bring warmth and wellbeing to any environment.

Swadd is a mock plain chenille with a soft feel, amazingly versatile and easy to maintain. It comes in 22 colours.

Cocoon is a supersoft polyester micro chenille bouclé, fluffy as a fleece. With an lovely feel, warm and

comfortable. An unmistakable symbol of the idea of refuge, of retreating to undergo a metamorphosis towards a more intense and dynamic new reality after a period of withdrawal and relaxation.

It is available in 20 shades.

The colour palette is gentle, with a preponderance of warm, comforting colours, like earth tones, creams and neutral shades which invite tranquillity and wellbeing. Both items share a colour range which allows them to mix and match perfectly with each other.

Cocoon fabrics boast over 100,000 Martindale cycles, which makes them ideal for upholstery, but also for making curtains and cushions. Indispensable pieces for turning the most practical minimalism into a pleasant space in which to let your life unfold.
