rubik II

Color y textura son la esencia para crear la nueva colección de happytex: RUBIK II

Una amplia variedad de tejidos con textura y falsos lisos de esta colección, permite crear un extraordinario juego sensorial en el que el tacto y la vista toman el papel principal; terciopelos, chenillas, cheviot, así como jaspeados de diferentes tipos y tramas componen las tres perchas dobles de telas de Rubik II.

Todo un manifiesto que reivindica la cultura del contacto y las caricias. Esta colección encuentra su esencia en el tacto y el color del tejido como elementos que nos permiten refugiarnos en el interior de nuestra casa, rompiendo con la frenética actividad diaria. Bouclés, piqué, tweeds, reps (tramas gruesas), se enriquecen con otras texturas que imitan piel, dando lugar a las telas Hamster, Dermis, Rhino, Hippo u Ovis que recuerdan a la delicadeza y suavidad del vellón. Telas que invitan a la calma, ofrecen confort, seguridad y protección. Una tranquilidad orgánica, relajada y elegante, pero lejos del sólido estilo rústico.

La fantástica variedad de esta selección se complementa con una extensa paleta de colores tradicionales recogidos de la naturaleza: Terrosos cálidos, cobrizos, rojos quemados, grises y neutros también azules turquesa, marinos profundos, todo tipo de verdes naturales que ayudan a crear un entorno relajante y de descanso donde podemos encontrar comodidad.

Como en la primera versión de Rubik, todas las combinaciones son posibles con esta colección, ya que, en un mismo tono, se pueden encontrar diferentes calidades, otorgando movimiento al conjunto y permitiendo incorporar diferentes texturas en una misma estancia, manteniendo únicamente la gama cromática.

Tejidos en poliéster, son aptos para el uso en cortinas y tapicería, lavables y con una alta resistencia al desgaste (25 000- 100 000 ciclos martindale).

Colour and texture are of the essence in creating the new Happytex collection: RUBIK II

The wide array of textured and mock-plain fabrics in this collection gives rise to an extraordinary sensory interplay in which touch and sight take the leading role; velvets, chenilles, tweed, along with different types and weaves of marl, make up the three double hangers of Rubik II fabrics.

Clear affirmation that the culture of contact and caressing has been reclaimed. The essence of this collection is apparent in the feel and colour of fabric as elements which allow us to seek refuge within our homes, breaking away from frantic daily activity. Bouclés, piqués, tweeds, reps (thickly woven) are enriched by other faux-leather textures, giving rise to the Hamster, Dermis, Rhino, Hippo and Ovis fabrics, which evoke the softness and gentleness of fleece. Fabrics which suggest serenity, offer comfort, safety and security. A relaxed, elegant organic calm far removed from sturdy rustic style.

The fantastic variety of this selection is complemented by an extensive palette of traditional colours taken from nature: warm ochres, coppers, burnt reds, greys and neutrals, as well as turquoise and deep navy blues and every type of natural green, helping to create relaxing, restful surroundings where we can take our ease.

As with the first version of Rubik, all combinations are possible with this collection since different cloths can be found in the same tone, endowing the ensemble with fluidity and allowing different textures to be blended in the same room, preserving only the colour range.

Woven in polyester, they are suitable for curtain or upholstery usage, washable and highly resistant to wear and tear (25,000 - 100,000 Martindale cycles).
